Floor=200: breadth term only trades recall
(precision stays 1.0 at both depths)
score
--min-species-marker-frac
species recall (normal depth)
species recall (low depth, med 0.6×)
strain recall ≥1× (low depth)
species precision (both) = 1.0
Relaxing the floor (200→50):
where the breadth term earns its keep
score
