Native 2bRAD saliva profiles are individual-specific within one day (8 subjects × 4 timepoints)

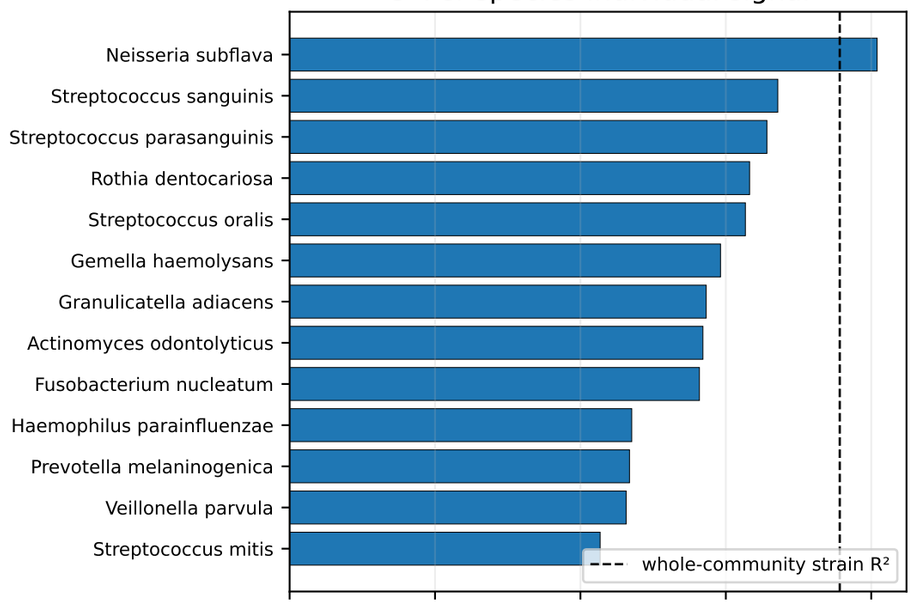

A Species-level PCoA
subject R^2=0.755, p=2.0e-04

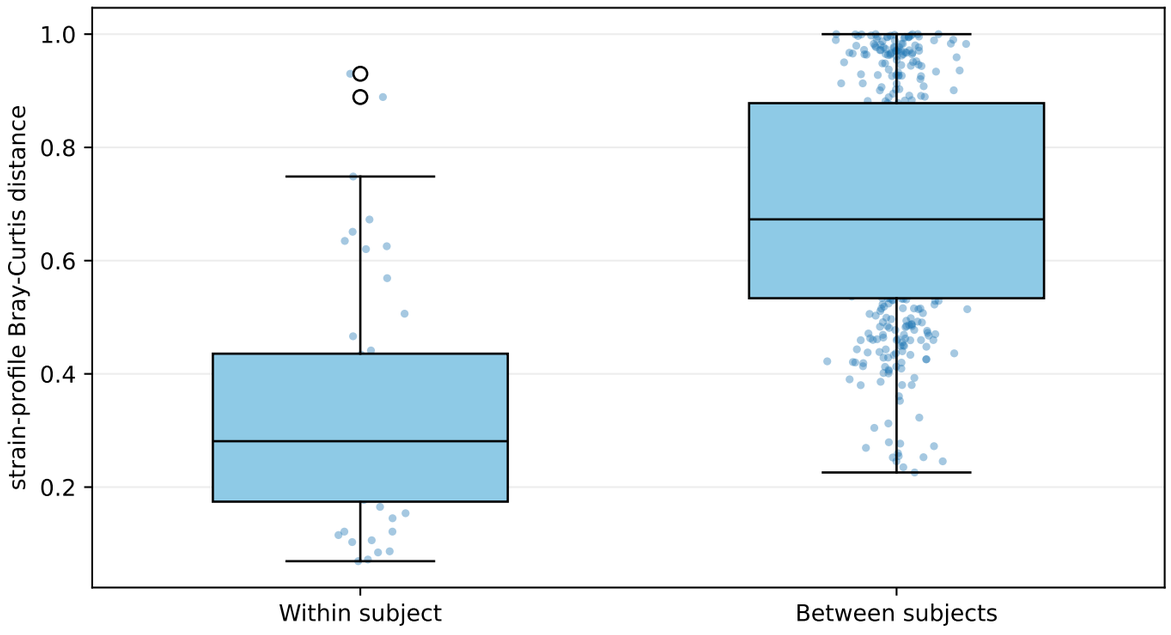

B Strain-level PCoA
subject R^2=0.757, p=2.0e-04

C Per-species individual signal

D Within- vs between-subject distance
p = 8.1e-19

E Within-subject host classification
8 subjects; one timepoint held out
