Native 2bRAD saliva profiles are individual-specific within one day (8 subjects × 4 timepoints)

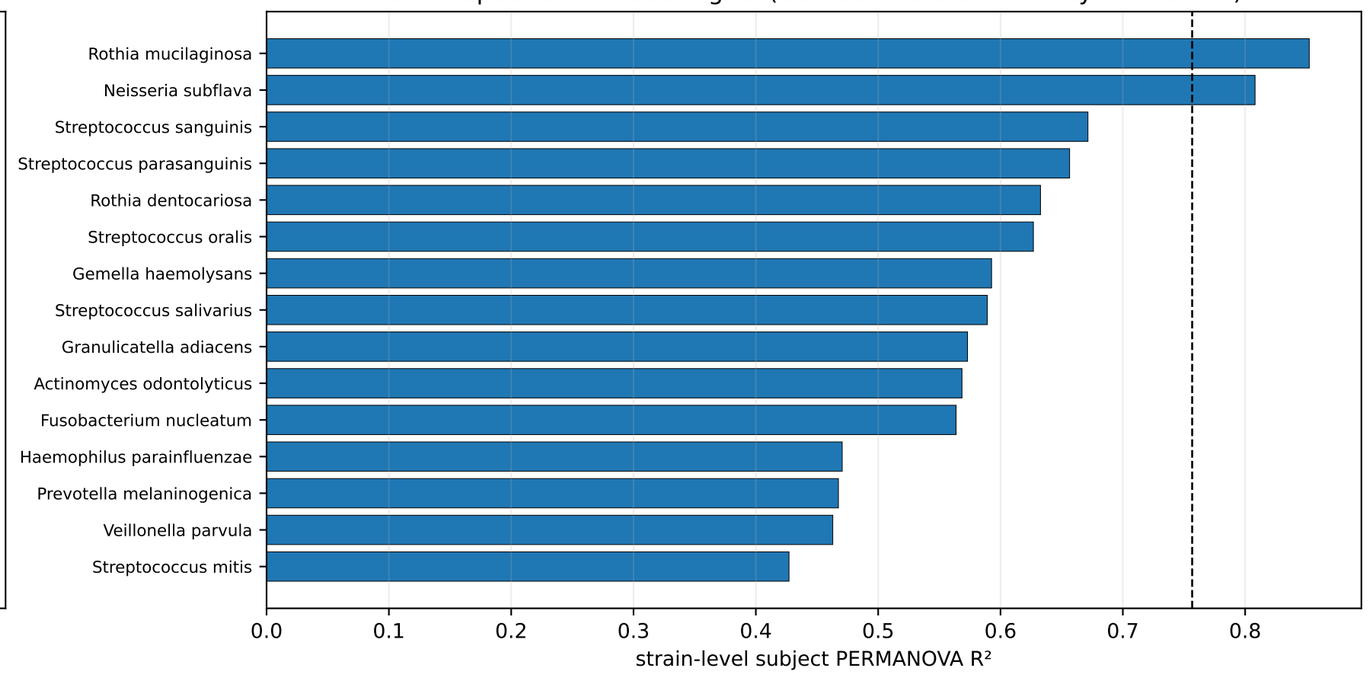

A Species-level PCoA
subject R²=0.755, p=2.0e-04

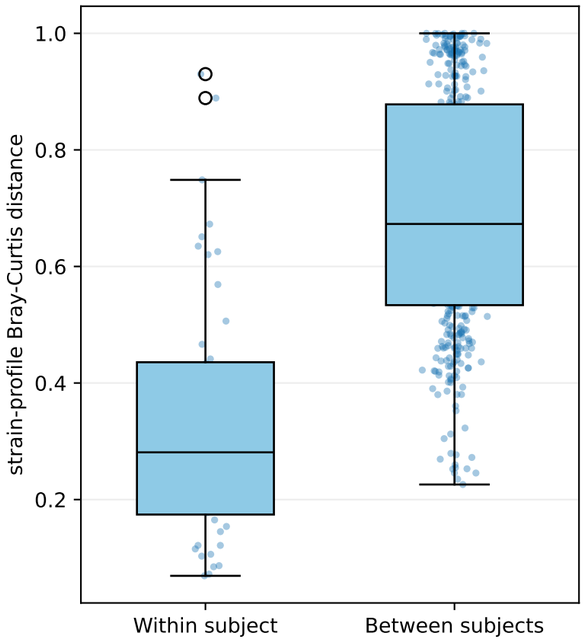

B Strain-level PCoA
subject R²=0.757, p=2.0e-04

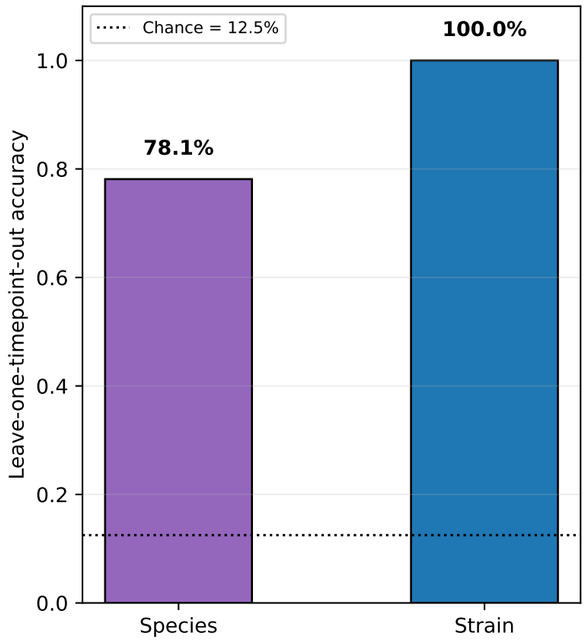

C Per-species individual signal (dashed whole-community R² = 0.757)

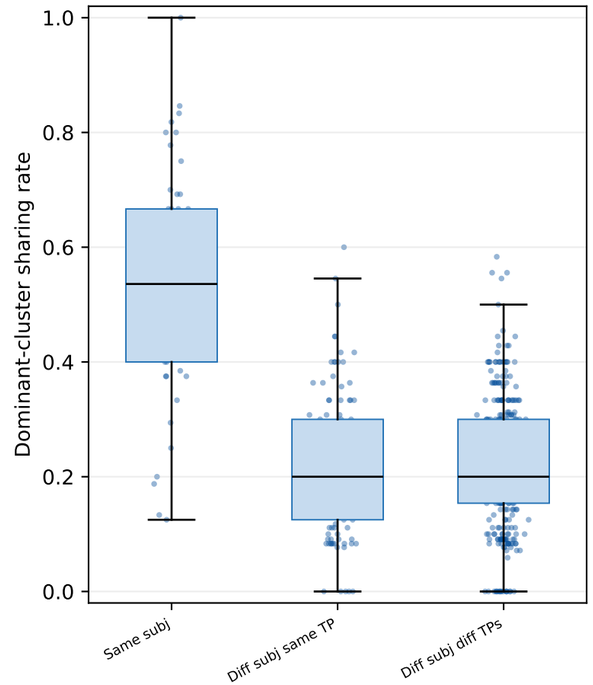

D Within- vs between-subject distance
p = 8.1e-19

E Within-subject host classification
8 subjects; one timepoint held out

F Saliva Dominant-cluster sharing

G Saliva Any-shared-cluster sharing
