A
Single-species precision
median precision
per-strain sequencing depth (×)
Strain2bScan
StrainScan
B
Single-species recall
median recall
per-strain sequencing depth (×)
C
Single-species f1
median f1
per-strain sequencing depth (×)
D
Database build time / species
E. coli
S. enterica
C. difficile
L. plantarum
P. gingivalis
A. muciniphila
S. aureus
M. tuberculosis
S. epidermidis
S. pneumoniae
C. acnes
P. copri
P. dorei
F. nucleatum
DB build time (s, log scale)
E
Profiling cost (same emulated env)
profile time / sample (s, log)
per-strain sequencing depth (×)
F
Multi-species profiling time
Strain2bScan (one pass)
StrainScan (Σ per-species runs)
105×
46×
time / community sample (s, log)
low
med
high
community depth
