

Saliva 2bRAD (Strain2bScan): strain-level profiles discriminate individuals — 8 subjects × 4 timepoints

Saliva 2bRAD: strain profiles are individual-specific and temporally stable (8 subjects × 4 timepoints)

Temporal stability: within-individual < between
($p=5.0e-25$) — profiles stable across the day

Leave-one-timepoint-out host ID
(train 3 timepoints → predict the 4th)
