

Saliva 2bRAD (Strain2bScan): strain-level profiles discriminate individuals — 8 subjects × 4 timepoints

Species-level ($R^2=0.76$, $p=0.000$, 1-NN acc=78%)

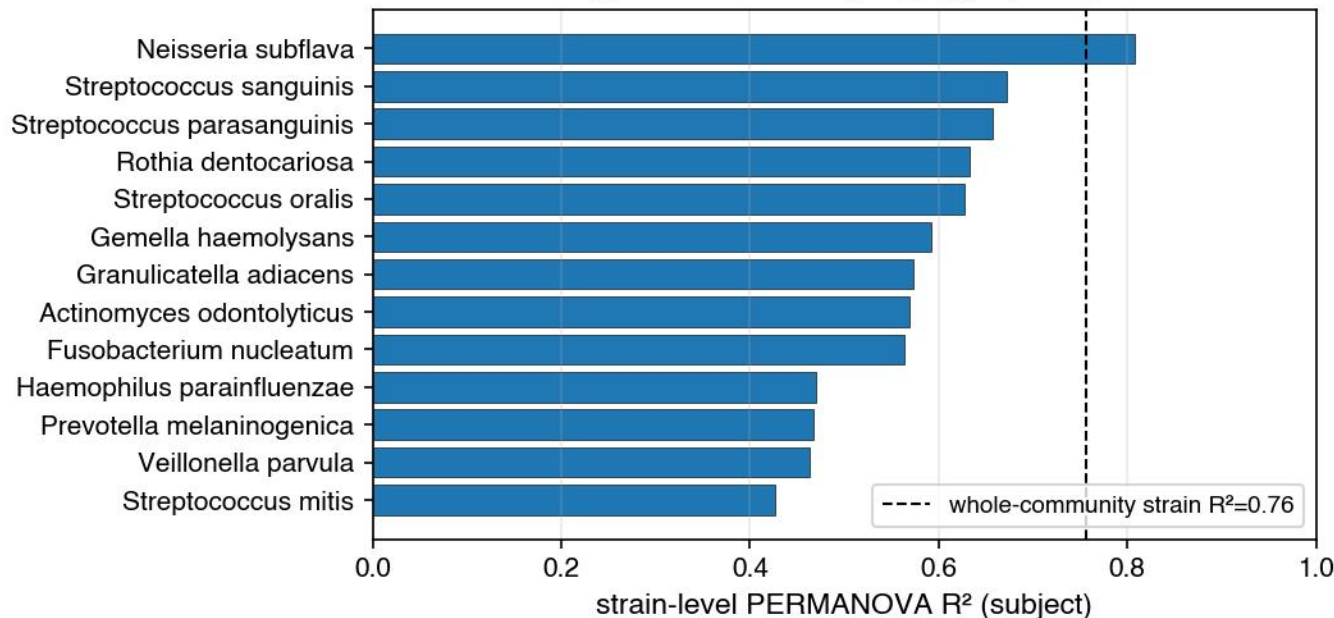

Strain-level ($R^2=0.76$, $p=0.000$, 1-NN acc=97%)

Saliva 2bRAD: strain profiles are individual-specific and temporally stable (8 subjects × 4 timepoints)

Per-species strain-level individual signal
(green = *R. mucilaginosa*; grey = ns)

Leave-one-timepoint-out
host-ID accuracy
(train 3, predict 4th)
